

LIFE IS SOFT

isospaceSKIN

A NEW BRAND

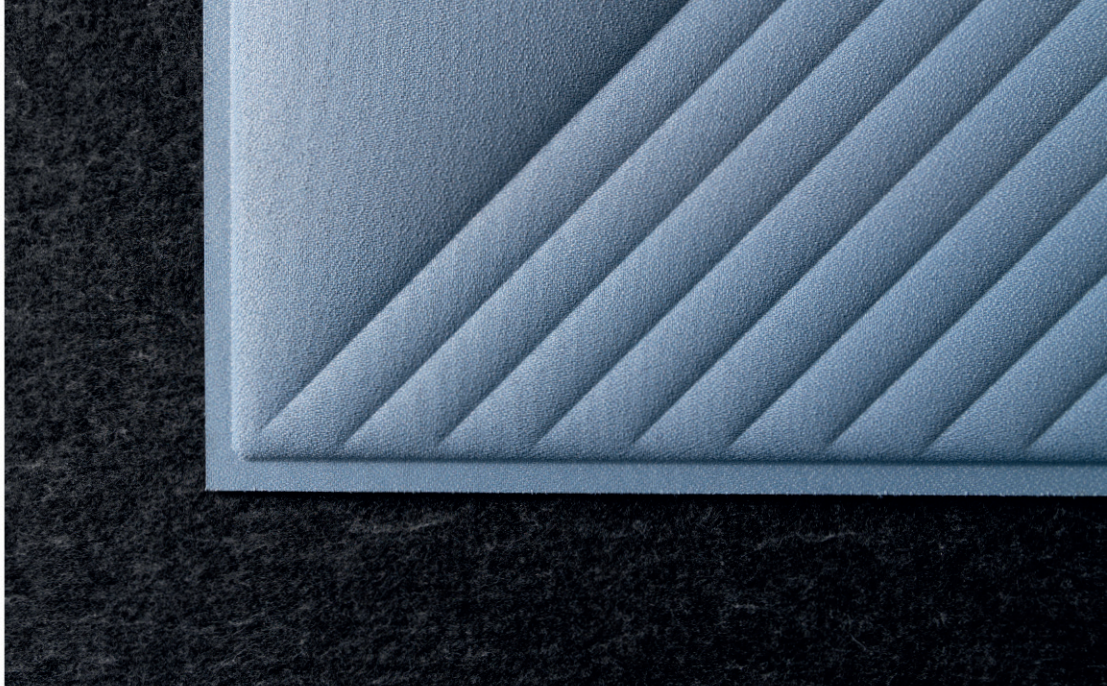

DECORATIVE SOLUTIONS FOR ACOUSTIC WELL-BEING

Isospace Skin was developed to give every space a new dimension that harmoniously combines comfort and aesthetics. A furnishing accessory that acts as a sound-absorbing element to promote human well-being within all living spaces. Isospace Skin ensures proper reverberation absorption in enclosed spaces and, thanks to its original aesthetic design, enhances any environment by integrating with it.

SHORT SUPPLY CHAIN

SHORT ITALIAN SUPPLY CHAIN

Isospace Skin is Made by Italians, in every sense. The project and technology are the result of Italian design and industry, while all the materials are produced within a few kilometers of the production site. The commitment to substantial, conscious Italian manufacturing is imperative, permeating ideas, materials and technology. The brand embodies Italian values by supporting labor and creativity that are recognized worldwide as synonymous with quality.

THE ORIGIN OF THE MATERIALS

SUSTAINABLE MATERIALS

Isolospace Skin is a project driven by the concept of sustainability, which is reflected not only in its mission statement, but also in the design of its materials and production process.

Research & Development considered it a must to offer a solution that would ensure, as far as possible, the use of recycled materials. Fabric research focused on solutions that would offer the best aesthetic value, as well as the best certifications in terms of quality, healthfulness and ecological footprint.

OBLIQUE COLLECTION

WALL

Like the pieces of an astonishing, ever-changing jigsaw puzzle, Isospace Skin Wall comes together to form an innovative and elegant wall covering. The modules can cover the entire wall in boiserie style, producing unique patterns, or create original signage and decors that are distinct from each other. The harmonious colors and geometric designs that softly reflect light enhance any space and make it comfortable.

OBLIQUE COLLECTION

BAFFLE

Discreet and never intrusive, but with a distinct personality: Isospace Skin Baffle fits into any room without the need to rearrange the furniture or the layout of the space. A suspended element that truly complements the architectural design of a space: It can become a room divider or mark out the boundary of functional areas. The double-sided version enhances its aesthetic and soundproof qualities.

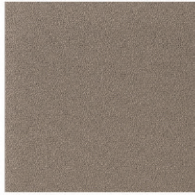

OBLIQUE COLLECTION

CEILING

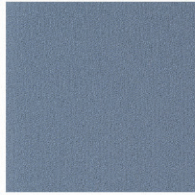

Isospace Skin Ceiling, suspended as an island and uses the ceiling as a plane to create soundproof clouds with the geometric decor fully exposed. The option to choose between different sizes and installation methods that play with the length of the hangings and the inclination of the panels guarantees results that confirm the visual identity of the spaces, while providing optimal acoustic comfort.

CUSTOM

NUANCES

ELEGANT, NATURAL SHADES

The Isospace Skin experience evokes the natural dimension of mankind and its immersion in the environment and the universe. The color palette is therefore inspired by the animal world, sending us back to a truer, more primitive dimension for authentic well-being. The Isospace Skin palette was created to bring refined, dynamic environments to life. HOWEVER, it is possible to request custom shades to suit your design needs.
